CORE COMPETENCIES

React & TypeScript

Frontend Architecture

Product Collaboration

REST APIs & Node.js

Data Model Design

Customer-Facing Development

WORK EXPERIENCE

Buddy Technology June 2022 - July 2026

Software Developer

Richmond, VA

- Designed and built Insurance Object Notation (ION™) data models for enterprise partners including Allstate and Aon, translating complex insurance products into Buddy's structured data format for digital deployment
- Managed the full ION build process from initial product digitization through partner approval and production launch, including API connectivity for all policy lifecycle events including quoting, binding, endorsements, refunds, emails, and forms
- Drove end-to-end resolution of partner implementation challenges, coordinating across internal and external teams to deliver purpose-built solutions and contribute upstream library improvements that strengthen the broader platform
- Coordinated with major insurance carrier partners on technical onboarding, documentation, and ongoing product evolution
- Collaborated closely with internal MCP (Model Context Protocol) architect to build a customer-facing demo chat interface, including conversational insurance quoting, binding, and inline Stripe payment flow
- Contributed to MCP design decisions by surfacing integration requirements discovered during chat development, resulting in targeted improvements to the MCP itself

PopMount, Inc. August 2018 - June 2022

Senior Visual / UX Designer

Richmond, VA

- Converted e-commerce sites from RapidWeaver to Shopify; built and maintained customer-facing platforms alongside WordPress and Shopify infrastructure
- Designed digital products and marketing materials for client partnerships; iterated on user experience based on customer feedback

Nexstar / Media General August 2011 - December 2017

Senior Creative Services Designer

Richmond, VA

- Designed and implemented digital solutions for clients across 170+ broadcast television stations; managed high-volume project delivery in fast-paced environment

PROJECTS

National Parks Explorer Full-Stack

Full-stack NPS companion app with search across 400+ national parks, saved favorites, multi-park trip planning with drag-and-drop reordering, and Google OAuth integration. Demonstrates end-to-end feature ownership and intuitive UX design.

React 19, Node.js, Express, PostgreSQL, Mapbox GL

MTG Grimoire AI Integration

Magic: The Gathering card explorer with agentic deck-advisor chat leveraging Claude API. Shows ability to integrate AI into product features and work with external APIs.

Next.js, Claude API, Scryfall API, AWS Amplify

CC Dashboard Full-Stack

Personal finance tracker for credit card and loan payments with OAuth-gated real data and public demo mode. Full-stack development with focus on delightful user experience.

React, TypeScript, Supabase, Recharts

EDUCATION

Coding Bootcamp Certificate University of Richmond	2022
B.S. Imaging and Digital Arts, Animation Track; Art History Minor University of Maryland, Baltimore County	2003
